ABOUT ME

Hi there! I am Front-end developer. I have experience in creating SPA with React & Redux, TypeScript / Javascript. I prefer to use styled-components (or CSS-modules with SASS) for styling. I love my job and treat it with all responsibility. I enjoy learning new technologies in my free time, solve kata on [Codewars](#) and learn English. Now I am improving my skills in this direction and expanding them with new technologies (now it's Mobx and NextJS). I also plan to learn React Native in the future. Open for your suggestions!

SKILLS

React | Redux
JavaScript | TypeScript
AXIOS | REST API
React hooks | thunk | React Router DOM
HTML | CSS | SASS (BEM)
Styled-components | CSS-modules
Unit Test | Git | Figma | Formik | Storybook
