JavaScript | TypeScript  
AXIOS | REST API  
React hooks | thunk  
HTML | CSS | SASS  
Styled-components | CSS-modules  
Jest | Git | Figma | BEM | Formik

### LANGUAGE

**English** intermediate (in progress)

### PROFILE

Hi! I have good experience in HTML/CSS development, I prefer to use the BEM methodology with the SASS preprocessor. At the moment I am developing apps on React(Redux) / TypeScript, I use styled-components (or CSS-modules) for styling. I love my job and treat it with all responsibility. I enjoy learning new technologies in my free time, solve kata on Codewars and learn English. I want to develop as a frontend developer and plan to learn MobX, React Native, Angular, NextJS, Flutter. After working as a freelancer, I would like to find a project work or full-time job!

### EXPERIENCE

#### FREELANCE FRONTEND DEVELOPER (2022)

- Creating SPA on React/Redux/TypeScript
- Creating new pages and components in app
- Adding new functionality, including working with the server
- Creating reusable components
- Refactoring, bug fixing, migrating to TypeScript, registration and login form creation

#### FREELANCE HTML/CSS DEVELOPER IN IOT COMPANY (2020 - 2022)

- Created UI-kit (table, dashboards, buttons, forms, modal windows, etc)
- Creating web-app for sensors monitoring
- Development app for admin
- Redesign of the company's main app
- Cooperation with the frontend developer to improve the interface
